

## LAKE PARADISE 2016 FISHERIES FACT SHEET

**LOCATION:** Lake Paradise is located approximately four miles south of Mattoon in Coles County.

**DESCRIPTION:** The lake covers 176 surface acres with a maximum depth of 16 feet and average depth of 8.5 feet. Public boat launching facilities were recently rebuilt and are excellent condition. The City of Mattoon (217/234-3611) collects a boating access fee which covers Lake Mattoon as well. Recreational opportunities include; fishing and limited boating. There is a no-wake regulation in effect on the entire lake. All tournaments must be registered through *ifishillinois.org*.

**MANAGEMENT ACTIVITIES:** The fish population in Lake Paradise is surveyed intensively every two years. The fish are measured, weighed, and scales collected before releasing them alive. Annual evaluations of saugeye have been made. Saugeye and channel catfish have been maintained by annual stockings from IDNR hatcheries. Desirable species of aquatic vegetation have been introduced in an attempt to improve water quality, reduce shoreline erosion, and provide valuable and necessary fish habitat. Unfortunately, despite an extensive effort, success was limited.

**FISHERY STATUS:** **Largemouth bass** are moderate in abundance due to a lack of aquatic vegetation for nursery habitat. Improved numbers of bass from 1/2-4 lbs. are present with fish over 6 lbs. caught on occasion. Fishing prospects are rated as fair-good for 2016.

**White Crappie** are very abundant. Growth rates vary from slow to fast within this population. Anglers may catch crappie up to 12 inches and 0.75+ lbs., but there are a lot of small crappie. **Black crappie** are present, but relatively, rare. Fishing prospects are rated as fair-good for 2016.

**Saugeye** (sauger X walleye hybrids), stocked annually, are developing into a good fishery. Saugeye are abundant from 12 to 22 inches present. Fishing prospects are rated as good for 2016.

**Channel catfish** are abundant in the lake. The average catch goes from 3/4 - 6 lbs., with the occasional fish over 10 pounds caught. Fishing prospects are rated as good-excellent for 2016.

**Flathead catfish** are low in abundance. Fishermen catch a flatheads infrequently. Catch and release is encouraged. Fishing prospects are rated as poor-fair for 2016.

**Bluegill** fishing is poor-fair. They are abundant, but few fish exceed 7 inches.

**Common carp** are abundant with fish exceeding 8 lbs. Fishing prospects are rated as excellent for 2016.

**Freshwater Drum**, commonly called drum "perch", are moderately abundant with fish exceeding 3 lbs.

**Yellow bass, longear sunfish, green sunfish, black bullheads, and yellow bullheads** are present, but are seldom harvested by fishermen due to the small size attained by these species. **Gizzard shad** is the primary forage for sportfish.

**REGULATIONS:** All statewide regulations are in effect.

Species	Daily Harvest Limits	Length Limits
<b>ALL</b>	<b>2 pole and line fishing only with only two hooks or lures per pole</b>	
<b>Largemouth</b> or Smallmouth Bass	6	14-inch minimum
<b>Channel Catfish</b>	6	none
<b>Saugeye</b> , walleye, sauger	6	14-inch minimum

**COOPERATIVE SPORTSMEN + STRUCTURED HARVEST = OPTIMAL FISHING QUALITY!**

Please Remove All Litter!
